RocketLasso Ricochet v1.0 for Cinema 4D: Ricochet easily creates stunning looks that have never been able to design and can unlock the effects that were hard or unattainable in the past. It's also an entirely new way to think about Splines.

It's an absolute beast! I'm just beginning to play in it. I'm absolutely amazed by the speed at which it functions. Cinema 4D is all about creating the ability to be innovative, Ricochet enhances it even more by allowing an entirely new set of possibilities. Ricochet lets you create designs that were previously unattainable.

- You can make any sound volume that is as bounce-filled you'd like, and then make infinite effects
- It's simple to incorporate your scenes by incorporating generator objects like hair, volume building, Sketch & Toon, and renderers from third-party.
- Create endless FUI interface elements, such as this head scanning effect.
- Mix several Ricochet Splines to create more sophisticated configurations
- Create new rigs that are brand new like this interactive and easy spider web using Ricochet's unique features. Ricochet
- Control and design sophisticated FX devices, such as these electrical and lightning effects
- Ricochet can predict its movement ahead of time, but it doesn't have an independent frame system as the particle systems do.
