Bitmapper 4 – PSD Template CreativeMarket - 7311846: Contrary to like products one is not an action pack, but an actual Photoshop TEMPLATE that is an editable layer template that can be adjusted. It does more than transform your photo from grayscale into a bitmap, it produces the bitmap effect on top of a Smart Object. It allows you to play around with light, colors, and size to achieve the desired effect. You can also manage the whole process.

- 1 .PSD File that contains the Template
- 1 .grd file that has 40 Gradients
- 1 .pat file with 3 different screen textures
