Move Layers, create corner hooks, stabilize clips, and then make stabilized precomps using the AE hide tracker.

MaskTracker+ concludes that the Mask Tracker in After Effects to some comprehensive Planar monitoring station which lets you do a great deal more than simply transfer masks.

- **Transfer layers** -- Animate a coating's position, rotation and scale according to a mask trail
- **Corner Pin** -- Produce a corner trap according to a mask trail. Simply set the corners on the present framework at the place where they ought to function as MaskTracker+ will include keyframes to maneuver it using the mask. Along with the ordinary corner trap, CC Power Lean and Red Giant Warp corner snare will also be supported.
- **Stabilized Precomps** -- The most favorite stabilized precomps of all MochaImport+ will also be accessible MaskTracker+. Track an item together with all the mask tracker along with MaskTracker+ will produce a precomp using a brand new view of the monitored object. In this setting, once you're able to create any type of modification, what you do is mechanically also employed to the initial standpoint. This really is really a lifesaver for painting, removal, and painting tasks.
- **Stabilize Footage** -- Stabilize shaky footage according to a mask trail. MaskTracker+ may eliminate the motion altogether, or make an innovative insertion rig which lets you separately fine-tune the amount of smoothness such as position, rotation, and scale.
- **Transfer Masks** should you've got a lot of masks going in precisely the exact same style, you can save yourself time simply by monitoring among them and then employing its monitoring data to another mask.

Effortless to Use

Built-in tutorials

Track your mask using the mask tracker as normal.

Pick the mask then click on the Load button at MaskTracker+ to automatically load the Monitoring information out of it.

Select the purpose you wish to use (move/corner pin/stabilized precomp Etc.) and click on apply.

If you do not know how to use an purpose, MaskTracker+ has built-in tutorials.

How it functions

Works with almost any mask

Masktracker+ assesses the motion of a mask and also reconstructs the monitoring Info out of it, therefore that it works with almost any masks if they're:

Monitored using all the After Effects mask tracker (contained in AE CC and broader Models)

- Glued from mocha
- keyframed manually
- Or come in another source

The only limit is that the Number of vertices of this mask may not Change as time passes. If you're utilizing the mask tracker, then this may be readily accomplished by not monitoring perspective or using masks with straight advantages for monitoring.

Load info from several sprays concurrently

You may also load the monitoring info from multiple masks concurrently. This Is particularly beneficial when you would like to

moderate the motion of many tracks to raise the precision. It may likewise be employed to alter the tracking area over time: simply start by monitoring a mask and if you would like to alter the tracking area, stop monitoring this mask and keep on using a fresh mask.

Can I utilize MaskTracker+ or MochaImport+?

MaskTracker+ includes a sister merchandise MochaImport+ that can do anything else But relies on mocha rather than the MaskTracker.

In our experience, operating with MaskTracker+ is usually Somewhat faster on Easy monitors, as you can perform all of the work in After Effects and thus don't have to change to a distinct program. On the flip side, the mocha planar monitoring technology frequently gives better outcomes for hard tracks that have motion blur or signs, such as. Additionally, mocha can quickly manage foreground components, do multiple monitors simultaneously, also supports X-Splines, which makes it the instrument of choice for larger monitoring and roto tasks.

Our suggestion: Your Very Best alternative is your Tracking Bundle that Comprises the two MaskTracker+ and MochaImport+. You can then perform many monitors easily and quickly with MaskTracker+; even when the mask tracker Provides you poor results, it is possible to change to Mocha rather than spending hours fixing your own track.
