Bad Reason Font - MyFonts

2025-02-10 16:44:47   label 我要反馈   下载页面

This is a list of all the 238 glyphs in the font, as well as OpenType versions that might only be available through OpenType-aware software.

Every basic character ("A") follows by Unicode variations that are based on the exact same characters (A A, A), ...), A, and so on). OpenType variations (small caps and alternates) as well as ligatures. ...). So you can view all variations of the same character all in one spot.
