

Aescripts Internal Property v1.0

2025-02-10 16:52:18 label 我要反馈 下载页面

Aescripts Internal Property v1.0: Effortlessly modify and reposition pre-animated objects by "internalizing" their animated properties. Generate multiple sets of keyframed animations for each property with this tool.

By "internalizing" the keys for each property, you can seamlessly re-key and adjust values without the need to alter or delete existing keyframes, ensuring smooth modifications within your animation.

Versatile Property Compatibility:

- Compatible with Position, Anchor Point, Rotation, and additional properties planned for the future.
- Effortless Object Duplication and Movement:
- Simplifies the process of duplicating and moving animated objects.

Convenient Property Management:

- Enables the internalization of properties, allowing easy manipulation without affecting existing keyframes.
- User-friendly tools for managing and removing internalized properties.

Streamlined Project Structure:

- Promotes efficiency by reducing the need for excessive nulls and layers in your project.
