Mix LUTs with No Reduction in quality and protect skin tones

LUT Mixer is a plugin and maybe Used as an impact in most supported host apps.

Working with LUTs (Look Up Tables) is popular and now many apps support LUTs. In the majority of apps, LUTs can only be implemented one after another. Because most LUTs have been optimized to be implemented to new image content, it generally occurs that any LUT implemented after the first one won't deliver the desired outcome anymore as it isn't applied to some neutral picture however to one already changed from the very first LUT.

- Security of skin tones in the effect of LUTs
- Subsequently restoring and correcting skin tones
- Boost LUTs up to some maximum degree of 150 percent
- Implementing LUTs negatively Rather than only positively
- The intuitive blending of LUTs
- And more...
