

Blender Market – Cyber Holograms

2025-02-10 16:42:47 [label](#) [我要反馈](#) [下载页面](#)

Cyber Holograms is a collection of Holographic materials that are available in two versions: one version that works with Extreme PBR Nexus and another version for Asset Browser that are included in the same pack.

Each material is procedural, easily animated, and operates flawlessly on Cycles and Eevee.

Gfx plugin details of Blender Market – Cyber Holograms

The product is in the **category from Blender Market**, for more information about this post you can click on the home page link in the sidebar.

Cyber Hologram Materials:

All materials are procedurally animatable and editable. They've been designed to work with the two games Eevee as well as Cycles!

Animations with gradients:

All materials that are included in the Asset Browser version are supplied with a gradient. Asset Browser edition is provided with a gradient that can create an animation using sliding material

Asset Browser Available:

All materials are available as well in the version that works with Blender Asset Browser. All materials are tagged and categorized.

Extreme Expansion of PBR Nexus pack includes:

This is very useful this is extremely convenient for Extreme PBR Nexus owners (Version 4.0.200 and higher). The materials are placed inside The Extreme PBR panel, they can be easily edited due to the unique hand-crafted design for every layout.

The main difference between the "Asset Browser" Version and the "Extreme PBR Nexus" Expansion version:

Within Extreme PBR Nexus, you do not have to go into in the Node Shader Editor, to modify Holograms Here's an example of the differences of a material that is handled through Extreme PBR Nexus and Blender's Normal Shader editor.

Example using Shader Overlay to Extreme PBR Nexus Addon:
In this case, I use the Holographic material using The Extreme PBR Nexus add-on (Not Included with Cyber Holograms)
You can then mix the base material with the hologram that you have put on

ix hologram projector lights:

The package contains six different kinds that use hologram beams designed to mimic the projection of a projector. You can use them on Cones as well as Cylinders objects to create an effect similar to the "Cone of Light" effect
