

VovSoft - AI Requester v3.5 (Win)

2025-05-16 10:23:58 label 我要反馈 下载页面

VovSoft AI Requester is a fully functional and easy-to-use desktop tool that connects immediately to Open AI API and any other compatible Open AI APIs. Users can use the latest AI technologies like GPT-3.5, GPT-4 and DALL-E online or offline. The software enables easy access to text generation, image creation, and speech-to-text or text-to-speech transformation. It is especially easy to use when chatting with AI bots, creating images from texts, or converting audio into text because it requires minimal resources, allowing even people without technical skills to work on it effortlessly.

- **Simple API Connection:** This allows easy connection to the Open AI API and other endpoints, including, but not limited to, GPT-3.5, GTP-4, DALL-E, and more.
- **Text Generation:** This process uses advanced AI models, such as those from GPT, to respond to a myriad of queries and subjects.
- **AI Models Variety:** Includes DeepSeek, LLama, and Mistral.
- Assistant behaviour can be tailored by instructing the AI to respond in a given persona.
- Inserting a textual description of the image can produce and alter high-quality images.
- Variations and editing of the images with transparency support are also possible.
- The speech recognition feature transforms audio files into text documents. It works with MP3, MP4, and WAV files.
- Users can operate with AI models both offline and when connected online.
- The level of randomness in responses and the number of words generated can be controlled with great precision.
