On big photographs, run the activity, edit the layers configurations, combine Everything together, be certain that you make a wallpaper from the coating (click on The coating and out of the menu visit: coating New Background from coating), today operate The activity again, edit the layer save.

Make Certain to use photographs with fantastic lighting, which are of very good quality, that Aren't pixelated which are between 1000-4000 pixels, for larger Pictures, run the activity twice.
