BlenderMarket – Blockblender v1.41: Convert any image or 3D model into a Minecraft block!

BlockBlender is an addon explicitly designed for Blender that transforms anything into Minecraft blocks in real time with the help of geometry nodes. It's perfect for Minecraft for building inspiration and making gradients. It's not difficult for those new to the program to use, provided you know how to use Blender. The options for customizing are described in a subsection below.

BlockBlender CANNOT directly import into Minecraft. It would be best if you utilized the tools at the bottom of this page to import it.

This addon is another way to integrate your designs into Minecraft:

The .schem exporter can be described as a third-party addon. I do not develop it. I don't control the cost. However, it can be considered an affiliate hyperlink, and I'll get a percentage of the earnings for using this link. Refer to the instructions on the product's page, and should you have bugs or suggestions, Contact Bryan. Kind and patient.

Texture baking

For baking with texture, I suggest this free extension named BakeLab, created by Specular. I'm not connected to the developer; it's an addon I've tested that has worked well for me.

What is it employed to do?

- Convert any 3D model to Minecraft blocks
- Convert any image into blocks
- Real-time model as your design is transformed into blocks
- Convert text into blocks
- Create complex block gradients with ease
- Plan Minecraft builds using the layer option

Options

- BlockBlender is highly customizable. Here are the alternatives for BlockBlender's full-featured version. The free version offers similar options. However, it is without the categories for the block.
- Blocks are classified that make choosing simple. You can also create your own choices by putting blocks around in different collections.
- Control colors easily using the palette included. You can also paint using vertex colors or create your own pictures.
- There are currently three dedicated tools to make gradients.
- Increase the variety of blocks available with the option to make noise.
- Make your plans using the layer option so you can start from the bottom.
