Aescript MP4 + Alpha Converter v1.4.0:

This tool converts videos or image sequences with alpha channels into MP4/H264 format while keeping the background transparent.

It offers a simple way to optimize how much space to use on the cloud and in local storage by shrinking file size from gigabytes to megabytes. This software serves its purpose in projects that require the simplicity of using an MP4 format for compression and make workflows easier for tasks requiring a lot of storage and heavy production, using the native MP4 renderer in Adobe After Effects 2023.

- Ease of Use
- One-click interface for rapid and user-friendly operation.
- No Additional Plugins or Codecs
- Works with AE 2023's built-in MP4 decoder, so there is no need for other software.
- Flexible Rendering Options
- Render instantly or add items to the rendering queue for later batch processing.
- Auto Renaming
- Changes names of already existing files.
- Customizable Output
- Specify the output directory of the rendered MP4 files.
- Supports Audio Tracks
- RGBA channel audio is preserved without affecting the sound behavior.
- Artifact-Free MP4 Output
- Automatic removal of artifacts caused by non-multiple-8 resolution.
- Organization Tools
- Automatically organizes project footage files.
- Contextual Alerts
- Warnings include alerts against common errors and data loss during conversion.
- Lightweight and Efficient
- Resources rendered with minimal effort fast.
- Support For Transparent Backgrounds
- Processes multi-channel alpha video files into separate MP4s (RGB and Alpha) and composites them without visual differences.

Usage Workflow

- Save and add the project name.
- Choose the output folder or leave it in the default project folder.
- Select all the items within the Project panel and press the Convert button.
- Use the Organize button to structure MP4 files in the Project panel.
- This software eliminates a manual, complicated, and lengthy procedure, making it simple and effective for people with demanding productivity requirements.
