Unreal Engine - Modular Night Market – Market Environment 5.3:

"In the heart of the city, a forgotten corner comes to life under the moonlit sky as a vibrant night market. Despite being overlooked by many, these resilient individuals craft their own destiny with resourcefulness. The scene, meticulously crafted in UE5 with Lumen real-time rendering, is an original concept by Andreas Rocha.

- Adaptive Modularity - Construct your own custom slums, shops, and entire markets by utilizing individual building pieces designed to fit a numerical grid.
- Dynamic Spline System - Effortlessly modify market stall layouts with an elaborate spline system, allowing for quick adjustments to suit evolving needs.
- Diverse Assets - With 172 static meshes ranging from fresh produce to modular kits, this pack offers versatility across a spectrum of projects.
- Optimized Performance - The well-optimized scene ensures smooth performance on both PCs and consoles, making it accessible for a wide range of platforms.
