

CData Drivers for Jira v24.0.9060 (21 Oct 2024) All Platforms + License Key

2024-12-18 23:03:15 label 我要反馈 下载页面

CData Drivers for Jira simplify data integration by providing standards-based connectors, enabling seamless access to Jira issue-tracking data across reporting tools, databases, and custom applications. This versatile solution facilitates effortless connectivity with live Atlassian Jira data for BI, analytics, reporting, ETL tools, and custom solutions. With a focus on BI and analytics, the drivers ensure swift real-time integration, unparalleled query performance, and comprehensive access to Jira data, seamlessly integrating with various analytics tools.

In the domain of ETL, replication, and warehousing, CData's Jira integration extends preferred ETL tools with dedicated drivers and adapters, ensuring robust, reliable, and secure data movement. This connectivity supports operational reporting and query offloading and enhances overall performance, providing valuable support for data governance and disaster recovery archiving. The drivers also support popular database protocols, including ODBC, JDBC, and ADO.NET, simplifying the connection and management of Jira data from diverse database management applications.

Catering to workflow and automation tools, **CData Drivers for Jira** seamlessly connect to Jira from popular data migration, ESB, iPaaS, and BPM tools. Providing straightforward access to Jira data from applications like BizTalk, MuleSoft, SQL SSIS, Microsoft Flow, Power Apps, Talend, and more, the integration process is streamlined. For developers, offers a data-centric model, dramatically simplifying integration and accelerating the development of higher-quality applications. Additionally, these drivers provide virtual database abstraction on top of Jira data, supporting advanced features like query federation and predicate pushdown for robust data virtualization capabilities.

This package includes the following components:

- Excel Add-In for Jira
- Jira ADO.NET Provider
- Jira BizTalk Adapter
- Jira Data Cmdlets
- Jira FireDAC Components
- Jira JDBC Driver
- Jira MuleSoft Connector
- Jira ODBC Driver
- Jira Power BI Connector
- Jira SSIS Components
- Jira Tableau Connector

Key Features of CData Drivers for Jira :

1. Fast and efficient connection to real-time Jira data
2. Unparalleled query performance and comprehensive data access
3. Seamless integration with BI, analytics, reporting, and data visualization tools
4. Extension of favorite ETL tools with Jira connectivity through drivers and adapters
5. Robust, reliable, and secure data movement for replication purposes
6. Connectivity between RDBMS or data warehouse with Jira for operational reporting and query offloading
7. Support for popular database protocols such as ODBC, JDBC, and ADO.NET
8. Simplified connection and management of Jira data from various database management applications
9. Integration with workflow and automation tools, including BizTalk, MuleSoft, SQL SSIS, Microsoft Flow, Power Apps, Talend, and more
10. Streamlined integration for developers, offering a data-centric model for accelerated application development
11. Virtual database abstraction on top of Jira data, supporting advanced features like query federation and predicate pushdown for robust data virtualization capabilities
