

Blender Market - Collection Viewport Display v1.1.1

2025-02-10 16:51:03 [label](#) [我要反馈](#) [下载页面](#)

Blender Market - Collection Viewport Display helps change the viewport settings of objects in a collection. Users can also hide/show names, axes, wireframes, shadows, and overlays while modifying display colour and modes (Bounds, Wireframe, Solid, or Textured). This helps save time while working, making it a must-have for dealing with large scenes and improving the 3D viewport productivity.
