Unreal engine - Ambiance Fx Pack 02 v4.27: Introducing the Parametric Ambiance Fx Pack, a versatile collection of effects designed to enhance various environments, similar to but distinct from Ambiance Fx Pack 01. This pack offers complementary effects unlike its predecessor, making it ideal for multiple applications. Each effect in this pack is meticulously crafted to be easily customizable through parameters, facilitating seamless integration into blueprints and allowing adjustments to accommodate different frame rates. Whether for games or movies, these effects are designed to bring realism to your projects, with materials conveniently adjustable and derived to suit your needs. Additionally, particle sizes and emission areas can be modified to achieve the desired visual impact.

Technical Details:

- Type of Emitters: Niagara
- Number of Unique Effects: 29
- Number of Materials: Master (15), Instance (26)
- Number of Textures: 63
- Number of Unique Meshes: 9
- Number of Maps: 2 (Summer/Winter)

These effects are demonstrated in fields for context and sizing purposes, although the terrain shown in the pictures is for testing purposes only and is not included in the package. Compatible with Windows and Mac platforms, the Parametric Ambiance Fx Pack offers many possibilities to elevate your projects with immersive and customizable effects.
