Blender Market - GroupPro v2.3.4: Introducing GroupPro 2.3.0, a groundbreaking Blender addon engineered to streamline the management of object groups and collection instances. Tailored for Blender versions 3.6 and 4. x, GroupPro empowers users to merge objects into container objects via non-destructive instance collections. With GroupPro, you can manipulate any instance directly within your scene, breaking free from the constraints of editing only the 'source' instance.

How can we improve the management of object groups and collection instances in Blender?

You can use "Blender Market - GroupPro."

Embrace recursive grouping, enabling the creation of nested groups while ensuring real-time updates across instances. Basic modifiers like linear and radial arrays are seamlessly integrated, with the option for additional modifiers upon request. Bid farewell to mirrored copy discrepancies with GroupPro's intuitive mirroring feature, guaranteeing consistent reflections with every use.

"Blender Market - GroupPro" Samples:

Effortlessly transform groups without disrupting other instances in the scene and dissolve groups with precision using the customizable 'Depth' parameter. Simplify material management with one-click editing for all group sub-objects, facilitating seamless material replacement, addition, or assignment.
