**Unreal engine - Stylized Modular Crystal Mine v5.3:** Introducing a stylized fantasy mine kit complete with corridors, tools, crystals, and more. With screenshots made using Lumen technology, this modular mine cave kit equips you with all the necessary props to construct a captivating mine environment from scratch, including rocks, ores, crystals, tunnels, and blueprints featuring wagon-following rails.

The assets within the kit are optimized for gaming and feature lightmaps, LODs, and collisions (automatically generated for simplicity and complexity where necessary). A showcase map is provided for easy visualization. Materials are highly customizable with adjustable parameters, ensuring seamless integration with your desired aesthetic. A skysphere and customizable water material are included to enhance the overall ambience.

- 70 Static Meshes: A wide variety of assets to enrich your mine environment.
- Fire and Flying Particle FX: Add dynamic visual effects to bring your mine to life.
- Procedural Foliage for Crystal Disposition: Easily populate your environment with crystals for added immersion.
- Blueprints for Chains and Rails: Utilize blueprints featuring splines to integrate chains and rails into your mine effortlessly.
- Collision, LODs, and Lightmaps: Each asset is equipped with collision, LODs, and lightmaps for optimal performance.
- Modular Mine Tunnels: Construct intricate mine tunnels using modular pieces for endless customization.
- Customizable Crystals and Ore Rocks: Tailor crystals and ore rocks to suit your desired look and feel.
