## 平面设计

This easy-to-use program lets users make their photos searchable by intelligently organizing and locating their photos using the power of AI. Anyone can browse and see their photos using Photo Keyword AI based on images without doing the same work that you do in many other photo-organizing software. This innovative technology uses advanced machine learning algorithms that analyze your images and then automatically identify the most relevant keywords to your photos.

You can use "On1 photo keyword ai".

After subscription, You can download it for free from here.

With a minimum of effort, it is possible to search the entire library of photos. You'll soon find the most loved photos, images that have been buried, or even manage new images without the hassle of managing tasks. Keyword AI also lets you search for photos. Keyword AI also lets you look up any metadata field by entering a word or phrase. If you're looking for images of birds simply type bird.

Automatic embedding of metadata and keywords to photos using XMP to make it compatible with other applications such as Adobe Lightroom Classic or Capture One. Fast and lightning-fast browsing for speedy photos, organizing, and culling. Complete metadata compatibility, which includes description, keywords as well as complete EXIF, IPTC, and XMP compatibility.

Keyword AI for Photo Keyword AI allows users to download images from cameras, memory cards, or smartphones with a built-in import dialog.

Support for files includes raw images from more than 800 cameras over 20 years, along with PSD, TIF, JPG, PNG, HEVC, and the majority of video files.

**Operating System:**

- macOS 10.15.6 and above
- Windows 10, 11 (64-bit only, with the latest maintenance releases)

- Intel® or AMD processor with 64-bit support; clocked at 2 GHz or faster with SSE 4.2 or later, or Apple Silicon

- Minimum 8 GB, recommended 16 GB or more

- Minimum 2 GB available for installation

- SSD recommended for optimal performance

Graphics:

- Windows: Requires a DirectX 12, DirectML, Vulkan 1.1, and OpenGL 4.2 compatible video card with at least 2GB VRAM, supporting a resolution of 1920x1080 at 100% scale factor.
- macOS: Requires a Metal, Vulkan 1.1, and OpenGL 4.2 compatible video card with at least 2GB VRAM, supporting a resolution of 1920x1080 at 100% scale factor.

What is On1 Photo Keyword AI?

On1 Photo Keyword AI is a standout feature within the ON1 Photo RAW suite, offering photographers a powerful tool for streamlining photo organization. By harnessing the capabilities of artificial intelligence, Keyword AI automatically scans and evaluates image content, generating tailored keyword suggestions that accurately represent the elements within the photos. This intelligent automation minimizes the need for manual keywording, allowing photographers to efficiently manage and categorize their extensive photo libraries. Ultimately, it simplifies the process of searching for specific images, enhancing overall workflow efficiency.
