

Ultimate 3d Flag Maker (Videohive 27905215)

2025-02-10 17:05:13 label 我要反馈 下载页面

Ultimate 3d Flag Maker (Videohive 27905215): Ultimate 3d Flag Maker, I create this template with to bring high details animation to After effect 3d element and to make it easy to use for everyone, You can make any flag you want with a very realistic render and very easy way just drag and drop your flag photo and you can put your logo or your brand name

How do I bring high-detail animation to a 3D After Effects element?

You can use "3d Flag Maker".

Where can I download the product?

After subscription, You can download it for free from here.

- Require Element 3d V2
- 4k
- 3d sequence included
- easy to use
- Two Flag Shape
- you can add a logo and text or photo
- video tutorial included

How to use

- first, go to the compositions folder open render comp, and open render Flag 1
- select the element layer and open the scene setup under effect controls
- select the file and relink the scene file, then open the select folder and select to relink folder (you will find it in the template folder)
- and do this again to render Flag 2
- now you ready to just add your Photo
- now go to the compositions folder and open edit comp and you will find Image Placeholder open it and add your photo
- when you finish your editing go to render comp and open render Flag 1 render flag 2 and render any version you want

What is a 3d Flag Maker?

a tool or template designed for creating three-dimensional representations of flags, within a video editing or motion graphics software.

These templates allow users to create dynamic and realistic 3D flag animations for videos or presentations.
