

DSPACK VCL Ported to Delphi 10.4.1 Sydney Full Source

2026-09-25 10:27:27

DSPack is a Group of Components and Course to Compose Multimedia Software using MS Direct Show and DirectX technologies. DSPack was made to work with DirectX 9 on Win9X, ME, 2000, and Windows XP operating systems. Currently, VMR (Video Mixing Renderer) is available on all Windows Operating Systems.

I have written DSPack together with the thought to extend a non-limitative pair of components and course to use DirectShow simpler. With DSPack, you may produce all that you want: DVD, capture, compression, filters, TV, webcam, DV...
