EmojiKit provides an easy way to access animated and static emojis in the AE.

Bring personality to existing projects, create realistic interfaces, or design something unique entirely from scratch.

Emojis can be animated, either in looping or still mode. EmojiKit is currently offering more than 50 Emojis.

### How to change the color of layers by adding emojis?

You can change the color of the layers using "Aescripts EmojiKit".

### Where can I download the product?

After subscription, You can download it for free from here.

### Can I edit emojis?

Yes. When you add an Emoji, You can join the composition and modify the animation.

### Do I have the right to distribute or sell the animations?

It's not a standalone application. If you want to make use of EmojiKit in conjunction with the project, you are working on and earn money :)

### How can I change the tone of my skin?

EmojiKit only includes the generic (yellow) skin tone of the emoji.

After adding an emoji to your project, you can easily alter the colors of every layer.

### Can I use my own Emojis?

The answer is no; EmojiKit doesn't allow adding custom animations or emojis. You can, however, request which Emojis we will add to EmojiKit in the next step.

Emojis can be customized using EmojiKit to alter the precompose of animated emojis.

### Will you add more emojis?

We plan to! Each animation we make requires time and effort.

As more EmojiKit licenses we can sell and the more we'll be able to support future updates. Therefore, inform your friends about EmojiKit!

- **Lottie compatible** - Each animation uses shapes and layers and has no effects. Every EmojiKit animation can be exported to Bodymovin Lottie Files export.
- **Shape layers are only for shape.** - Each Emoji is constructed using form layers carefully organized into comps.
- **Maintaining your project in order and the animations crisp** - You could even transfer your project, but without EmojiKit.
- **Free updates - We plan** to expand the EmojiKit library by adding styles, emojis, and animations shortly. Existing
