Here is actually the CxR Preset, to that we owe our Beautiful colors and constant appearance. We have been using this particular preset on each Single image you may know from us for the previous 3 decades. It took us a Long time to create this weapon. It's a complete - Round ability and Functions in almost any light situation. That is Most Likely the Reason we adore it so much. We do not promote a standalone bundle but only just the"Heart" of the editing. The CxR Fundamental Preset! To make editing much easier, you will find 4 Variations of this simple Preset included. These alterations are situational For the various lighting scenarios you need to manage. (Display, artificial Mild, after light, tropical) Why if we market an entirely preset package, should we use Just one preset? And why if we market a b/w preset in case we hardly post b/w pictures ourselves? This led us to the conclusion, to simply give you the one and Just CxR Preset that simplifies our job to your fullest.
