Blender – Auto-Terrainer Lite V2: Introducing the Automatic Blender Terrain Generator, a robust and user-friendly tool that transforms any low-poly mesh into lifelike and customizable terrain. This versatile tool empowers you to easily craft mountains, valleys, islands, deserts, forests, and more. Shape, size, height, and detail adjustments are conveniently controlled by sliders and inputs, providing flexibility in tailoring your terrain to meet specific requirements.

The Automatic Blender Terrain Generator features an intelligent material that dynamically adapts to the terrain, ensuring a natural and realistic appearance. Customize the material's colors, textures, and lighting to align with your creative vision. Experiment by combining different materials to achieve unique and stunning effects.

Unlike a one-size-fits-all magical preset, the Automatic Blender Terrain Generator is a node group designed for exploration and customization. Dive into the inner workings of the generator, tweaking it to your preferences. Utilize it as a foundational tool for crafting various terrains and assets, extending its versatility beyond standard terrain generation. Elevate your creative possibilities with the flexibility offered by this innovative Blender addon.
