

CData Drivers for IBM Cloud Object Storage v24.0.9060 (21 Oct 2024) All Platforms + License Key

2024-12-18 23:03:00 [label](#) [我要反馈](#) [下载页面](#)

CData Drivers for IBM Cloud Object Storage simplify the integration of live data from IBM Cloud Object Storage into various data tasks, including BI, Reporting, Analytics, ETL, and custom applications. These drivers enable effortless connectivity, offering fast and comprehensive access to real-time IBM Cloud Object Storage data and metadata for seamless integration with popular analytics tools. Solutions in ETL, Replication, and Warehousing, **CData Drivers for IBM Cloud Object Storage** provide robust, reliable, and secure data movement, supporting operational reporting, query offloading, performance enhancement, and data governance initiatives.

Versatility is a key feature of , supporting multiple database protocols like ODBC, JDBC, and ADO.NET and wire-protocol interfaces for SQL Server and MySQL. This adaptability ensures easy connectivity and management of IBM Cloud Object Storage data from a wide range of database management applications, enhancing overall data management capabilities. Additionally, CData's drivers facilitate integration with workflow and automation tools and popular developer technologies and offer data virtualization features, providing developers and data professionals with a powerful and efficient solution for building high-quality applications.

This package includes the following components:

- Excel Add-In for IBM Cloud Object Storage
- IBM Cloud Object Storage ADO.NET Provider
- IBM Cloud Object Storage BizTalk Adapter
- IBM Cloud Object Storage Data Cmdlets

- IBM Cloud Object Storage FireDAC Components
- IBM Cloud Object Storage JDBC Driver
- IBM Cloud Object Storage MuleSoft Connector
- IBM Cloud Object Storage ODBC Driver
- IBM Cloud Object Storage Power BI Connector
- IBM Cloud Object Storage SSIS Components
- IBM Cloud Object Storage Tableau Connector

Key Features of CData Drivers for IBM Cloud Object Storage :

1. Fast and easy connection to live IBM Cloud Object Storage data
2. Seamless integration with BI, Reporting, Analytics, ETL Tools, and Custom Solutions
3. Superior query performance and comprehensive access to IBM Cloud Object Storage data and metadata
4. Integration with popular analytics tools for efficient data processing and visualization
5. Robust, reliable, and secure data movement for ETL, Replication, and Warehousing tasks
6. Connectivity to RDBMS or data warehouses to support operational reporting and query offloading
7. Support for data governance initiatives and archival of data for disaster recovery
8. Compatibility with popular database protocols such as ODBC, JDBC, and ADO.NET
9. Integration capabilities with workflow and automation tools, including BizTalk, MuleSoft, SQL SSIS, Microsoft Flow, Power Apps, Talend, and more
10. Simplified integration for developers with a data-centric model, allowing for faster application development
11. Data virtualization features provide a virtual database abstraction on top of IBM Cloud Object Storage data.
12. Advanced capabilities for query federation and predicate pushdown for enhanced data virtualization
