PASTICHE wants two things to perform its magical:

- A supply layer to specify the shape of the collage
- And a lot of layers to be set within this shape.

You can choose among different options to personalize

The appearance of the college. Possibilities are unlimited!

Offers instinctive controls to fine-tune the place

Scale, rotation, and opacity of those collage layers.

If the origin layer varies over the years

PASTICHE Can animate the layers

So that they morph from 1 collage to the next.

Again, many cartoon parameters are readily available.

A good companion for our math engine **Newton2**.

- **Quick and powerful:** Handles countless layers effortlessly
- **Intuitive parameters**
- **Creative**
- **Only manipulates Transform of comp layers:** Everything Created by Pastiche could be altered by hand that a posterior
- **Cartoon manner:** Produce never seen before the cartoon

Changes:

- Added a check for non-separated dimensions (position). A warning message is thrown when one of the layers position has the Separate Dimensions switch turned on.
- fixed a bug with 32bpc projects
