

Progress Telerik Kendo UI for jQuery 2024 Q4 v2024.4.1112 (12 Nov 2024) Retail Version

2026-05-01 23:39:51

is an extremely powerful toolkit that makes it easier for developers to build responsive, high-performance web applications. It makes building rich user interfaces for desktop, tablet, or mobile apps much simpler by packing more than 100 UI components. Kendo UI is a great choice for modern web projects; it streamlines development and saves time whether you're using jQuery, Angular, React, or Vue.

This library has great tools and features like responsive design, touch-optimized components, and cross-browser compatibility for enterprise applications. It uses modern HTML standards and works ideally well on older browsers, guaranteeing that your app will look good and run silky smooth on any device. Robust server-side API's let you pick between working on the client side, server-side, or both (I think I prefer 'server side,' but I'm still learning).

In addition to professionally designed themes, **Telerik Kendo UI for jQuery** provides CSS-based CSS styling so you can build polished, pixel-perfect applications. A ready-made but customizable solution for developers who want to go faster at building applications with the same quality and performance.

Key Features of Telerik Kendo UI for jQuery :

1. **Rich Views and MVVM Support** – Seamlessly bind your UI to the backend using the MVVM framework.
2. **Client-Side and Server-Side Flexibility** – Full control with both client-side widgets and server-side APIs.
3. **Responsive and Cross-Browser Compatibility** – Create great apps that work on all devices and browsers.
4. **Touch-Optimized Components** – Ensure smooth touch functionality for tablets and smartphones.
5. **Customizable Themes and Styling** – Includes 11 pre-designed themes with full CSS customization.
6. **Wide Range of jQuery-Based Widgets** – Over 100 UI components for data-rich and interactive applications.
7. **Enterprise-Grade Performance** – Optimized for speed and scalability in large, complex applications.
