How to use templates to make 2D animation?

You can create 2D animation using "Pretty Sweet – 2D Animation Toolkit".

Where can I download the product?

After subscription, You can download it for free from here.

How to use

Go to "Navigation" comps first, and choose the elements you want to use

Copy and paste it to your comp.
It's really easy to customize, go to effect controls to change colors.

TITLES:

1. Open "Your Text" Comp and put your text

2. Click on "Color Control" in the main title composition. Change colors.

3. Drop it into your composition

ELEMENTS:

1. Open "Navigation ..." Composition, click on effect controls, and choose your color.

2. You can edit 2 colors of enable "Fill" effect and use 1 color.
Copy and paste it into your composition

LOGO REVEALS

Go to "Navigation_Logo"
1. Put your logo and Tagline in "Your Logo", "Your Tagline" Compositions

2. Use the "Color Control" Layer in the "Render.." composition to change colors

3. After that render the "Render" composition to get the final result.

LOWER THIRDS

1. Put your text in "Text" Compositions

2. Use the "Color Control" Layer in the "Lower Third" composition to change colors

3. After that render "Lower Third"

Custom

1. Edit Blobs.
You can edit the path of the blobs. Move markers to change speed. !!Work in this comp!!

Go to "effect controls" And customize it.

Click on "Solo" to work with one of these layers.

Editable Transition

Click on "Control"

Choose 1 of 3 versions and edit this. You can change color, rotation, and scale.

Sketch

This is an adjustment layer, so you can copy and paste it to your comp. "Test" layers need to see the effect, you can delete that.

Go to "Effect controls" and customize it

What is Pretty Sweet – 2D Animation Toolkit?

"Pretty Sweet" is indeed a 2D animation toolkit, it might be software or a collection of resources designed to assist with 2D animation tasks. Such tools often include features for creating and editing 2D animations, providing a range of drawing and animation tools, and sometimes offering pre-made assets or templates to streamline the animation process.
