# Retouch4me Eye Brilliance v1.010

2025-02-10 16:39:02　　label 我要反馈　　下载页面

Retouch4me Eye Brilliance is a plugin designed to enhance eyes in photos automatically.

It uses the dodge and burn technique to emphasize the eyes, drawing viewers' attention. The plugin can also create a separate eye mask layer, useful for sharpening. With its single-click functionality, it is highly efficient for processing group portraits and high-volume photography, saving significant time.
