

JavaScript Fundamentals - David Tucker

2025-03-27 20:52:23 [label](#) [我要反馈](#) [下载页面](#)

provides a comprehensive introduction to the core concepts of JavaScript programming. Through this course, you'll delve into the essential syntax, data types, and variable handling in JavaScript. Explore how to effectively manipulate collections, implement loops, and utilize functions for efficient coding. Additionally, you'll master the intricacies of asynchronous programming and error handling, which are crucial for developing robust applications. By the end of **JavaScript Fundamentals - David Tucker**, equipped with knowledge of modules and project organization, you'll be primed to embark on your JavaScript programming journey, capable of crafting your own dynamic and interactive web applications.

JavaScript Fundamentals Table of contents:

- 1. Course Overview (Duration: 1 minute)
- 2. Getting Started with JavaScript (Duration: 21 minutes)
- 3. Syntax, Variables, and Data Types (Duration: 60 minutes)
- 4. Data Type Conversion (Duration: 31 minutes)
- 5. Conditional Logic and Control Flow (Duration: 50 minutes)
- 6. Collections and Loops (Duration: 53 minutes)
- 7. Functions (Duration: 45 minutes)
- 8. Asynchronous JavaScript and Error Handling (Duration: 60 minutes)
- 9. Modules (Duration: 29 minutes)
- 10. Code Formatting and Testing (Duration: 14 minutes)
