This is the Water Drop Texture Overlay, an assortment that will aid in creating the winter look of the moment you've captured. It's water drop dew textures on a glass transparent window, which will illustrate the scene you're taking the picture from the opposite side of the glass.

The effect of overlays is similar to water bubbles that adhere to the transparent glass after the raindrops. The abstract design of the drops of water and the blurring effect make the overlays look more realistic.

The collection of texture overlays is available in JPG and can be used for a variety of purposes. It could be used to create photo overlays, or it can create the appearance of glass. In addition, it's possible to apply it to background designs or to apply it to mockups of beverages to create the impression of cooling or freezing on promotional items.
