The GLITCHES sound pack is designed to be your current "go-to sound pack" for every kind of frame drop or transmission breakdowns user interface, and other sci-fi projects. An extensive collection of high-tech single glitches that include a variety of complex glitches that are pre-designed to bring the finest glitch sound effects into your studio. Make your own customized glitches through layering, processing, and layering one or more sounds, or use the preset sounds that are designed when you do sound design on the go. These glitches made of high-tech technology are essential for anyone artist looking to broaden their sound palette!

### A Unique SCI-FI CONSTRUCTION Kit

All sounds were created using various digital and analog source materials like semi-modular synthesizers(SMS), feedback loops, and TV recordings along with various analog noises and broken hardware components. We then processed the sounds with distortion/saturation, granular and delay effects, and out came a great toolbox for all situations where you need glitch sounds.
