

Cel-Shading Photoshop Action CreativeMarket-5658779 (ATN)

2025-02-10 17:02:12 label 我要反馈 下载页面

Cel-shading is a special impact that creates a non-realistic image rendering of characters, objects, and landscapes. It takes some talent to create this effect, however, there's a shortcut you can take the use of this Cel-Shading Photoshop action. This motion will enable you to create the outlines, colors, and shading of a digitally Cel shaded photograph automatically, except they want to trace, paint or draw by using hand.

How to use action

- Load the motion into Photoshop
- Hit play in the motion menu

Alternatively, you can open up the motion panel by way of going to - Window - Action, and then discover 'Cel-Shade' and hit the play button.

Voila! The last end result is a cel-shaded impact with daring outlines, bright shades, and defined shading.

This Photoshop motion works pleasant with pics at the preferred dimension of 1920x1280 pixels.

- Compatible with: Adobe Photoshop
- File Type: ATN
