Blender Market - Botaniq v7 Tree and Grass Library catering to architectural visualization, environmental design, and landscaping needs.

How to design the landscaping environment in 3D using presets?

You can design your project beautifully by using "Blender Market – Botaniq v7 – Tree And Grass Library".

With over 111 optimized 3D assets and 4 scatter presets, this library offers a diverse range of vegetation including grass, trees, flowers, weeds, and more.

"Blender Market – Botaniq v7 – Tree And Grass Library" Samples:

New changes include a transition to an asset pack format, geometry nodes integration for vine systems, and bug fixes. Notable features include animation capabilities, vine creation, asset scattering, asset spawning, ground snapping, randomization of scale and rotation, and the option to convert assets to editable or linked forms within scenes.
