1. 2.

The Blender Market - Real Cloud Generator v1.0.3 is an impressive addon and asset library designed to simplify the creation of realistic clouds in artwork. With user-friendly features, it allows for the effortless transformation of meshes into clouds.

How to easily convert meshes into real clouds with one click?

You can use "Blender Market - Real Cloud Generator".

Key considerations include the importance of GPU utilization for faster VDB cloud rendering and the variability in rendering speed based on computer specifications. It is primarily compatible with the Cycles renderer, with limited functionality in Eevee.

"Blender Market - Real Cloud Generator" Samples:

Key features include one-click mesh transformation, an optimized shader for faster performance, a library of 200 VDB clouds, an intuitive N-Panel control interface, and an auto-setup feature for Cycle rendering settings, making it accessible for beginners.
