

Archipack 2.7.2 for Blender

2025-02-10 16:45:02 [label](#) [我要反馈](#) [下载页面](#)

Archipack 2.7.2 for Blender is an extension designed to enhance the productivity of architectural visualization (archviz) artists using Blender 2.8, 2.9, and 3.0.

This add-on provides powerful parametric architectural primitives and offers intuitive, real-time interactive editing.

How do we provide a set of powerful parametric architecture basics?

You can use "Archipack" in Blender.

"Archipack" Samples:

It ensures complete control over objects and produces standard Blender meshes for high portability and compatibility with render farms.

Additionally, Archipack includes a robust library of materials and preset management features, making it a comprehensive tool for advanced archviz projects.

For more details, users can visit the home page or search for similar products like Archipack 2.4.0.
