This comprehensive package encompasses a fully-fledged game complete with seamlessly integrated features such as Ads, Achievements, Leaderboards, In-App Purchases, Rate Game Popups, Localization, Daily Rewards, Cross-Promotions, and Notifications.

Additionally, it incorporates the following standalone assets:

All Platforms Save:

- Save and load game data effortlessly across all supported Unity platforms with a single line of code.

Daily Reward:

- Enhance player retention by implementing Timer buttons and Calendar popup rewards.

Easy Achievement:

- Submit achievements and scores with minimal setup, catering to both Google Play and the App Store.

Easy IAP:

- Facilitate in-app purchases with minimal setup, requiring little programming knowledge.

Localization:

- Globalize your app by easily translating it into multiple languages using the Auto Translation feature.

Mobile Ads:

- Display ads seamlessly across Android and iOS platforms with a single line of code, supporting various advertisers (AdColony, AdMob, AppLovin, Level Play (ironSource), UnityAds, Vungle).

Mobile Cross Promo:

- Utilize in-house ads to dynamically promote your own games through a configuration file stored on a server of your choice.

Mobile Notifications:

- Schedule local notifications effortlessly with just a single line of code.

Rate Game:

- Implement a rate popup (or native popup) easily with a single line of code.

All these assets function independently of this project; import only the necessary folders into your own project. This game serves as an excellent tutorial, showcasing the seamless integration of any of our assets into a production game. The code is well-commented, ensuring clarity, and the core engine is versatile, applicable for creating various types of games.

This package includes all assets used (Textures, Sounds, Models, Animations, Scripts) and is ready for building.
