LED Effect Photoshop - 45506087:

This action pack for Photoshop enables users to create LED screen effects with just one click.

It's perfect for designing LED displays with text, shapes, or logos and offers easy customization.

The package includes actions to create animated LED text GIFs with color effects.

It's compatible with Photoshop CS and CC, works in all languages, and requires basic Photoshop skills.

The resulting LED board design is fully editable, with separate layers and intact layer styles.

The pack also includes LED patterns and a PSD mockup for further customization.
