Magic CD/DVD Burner Pro is an easy-to-use application that allows you to create discs in just a few mouse clicks. It can be used to backup data to a CD/DVD.

It has an intuitive interface that allows you to drag and drop items from the file browser to add them to your compilation. You can view the contents of the disc on the left side panel. A double click will allow you to delete a file.

Quickly check your device to see its capabilities. You can also perform a disk erase on rewriteable media right from the main interface. It shouldn't take too much time; we took about 2 minutes to complete ours.

The program can create an ISO file. Select the files you wish to add, then select "ISOFile", for the burning process. You can burn the ISO file to the disc later by clicking the "Burn ISO" button and selecting the file.

You can choose the drive you wish to burn files to and the speed you desire when you do so. You will see a progress bar and the percentage of data written to the disc.

It is not a benefit that the program runs fast. It took six minutes to copy 120 MB of data onto a CD. The memory and processor load were insignificant during the process.

Magic CD /DVD Burner Pro offers only basic functions for a CD /DVD burner, which can erase discs. This program is not made for creating audio or video discs.

Magic CD/DVD burner (.NET 1.x/2.x/3.x/4.x). Data CD/DVD burning components designed for dot Net developers. Magic CD/DVD burner (.NET) was designed to meet Data CD/DVD burning requirements.
