What is the 808 Bundle?

The term "808 Bundle" is commonly used in the context of music production and refers to a collection of sound samples, presets, or instruments that are designed to create or enhance the sound of the iconic Roland TR-808 drum machine. The Roland TR-808 is a classic drum machine that has been widely used in various music genres, particularly in electronic music and hip-hop.

These bundles can be useful for producers and musicians looking to incorporate the iconic 808 sound into their music production. You can find 808 bundles from various software developers and sound design companies, and they are often compatible with popular digital audio workstations (DAWs) and music production software.
