

Astro Panel Pro 6.0 for Photoshop

2025-02-10 16:58:11 label 我要反馈 下载页面

Astro Panel Pro 6.0 for Photoshop: We chose to give this new Astropanel the designation "Pro" because everything is transformed: even the previous features have now been totally revamped to be more efficient and fluid.

Alongside improving the product in general We have also implemented the following features that are new:

- Saturation: For always more vivid and beautiful shades.
- Orton Pro: Unlike the traditional Orton Pro, this time you'll have the option to modify the effect to suit your preferences.
- Orton Sharp: Do you love the dream effect, as it causes you to lose details? Our programmers have discovered the ideal solution for creating an uncluttered, clear Orton Effect that does not ruin the finer details.
- Glow for an elegant and calming effect.
- Vignette: for professional and advanced Vignetting: For professional and advanced.
- Restore HighLights: to reclaim the light source without causing artifacts.
- The Rescue Shadows feature: to retrieve shadows, without making noise.
- Shades of Noise Reduction: Lessens noise generated by heaths.
- Noise Chrominance Reduction
- New Noise Reduction
- Refined Clarity
- Mid-HighLights and Mid-HighLights contrast 50%.
- AstroNoise Reducer: To decrease noise but not alter the haze
- AstroNoise Reduce Luminance to reduce the brightness without causing artifacts
- AstroNoise Reduced Chrominance: to lower the chrominance of haze without impacting it.
- Eliminate Green Cast: In order to minimize the common green cast seen in astrophotography.
- Group
- Sum
- Duplicate
- Camera Raw
