- 15 Stands.
- Seven test objects.

What isRedshift Light Suite for C4D?

In the context of 3D graphics and rendering, a "light suite" for software like Cinema 4D (C4D) would be a collection of tools or presets designed to enhance and streamline the lighting workflow within the application, particularly when using the Redshift rendering engine.

Such a suite might include:

- **Light Presets:** Ready-made lighting setups or configurations that users can easily apply to their scenes to achieve specific looks or moods.
- **Lighting Tools:** Additional tools that facilitate the placement, manipulation, and customization of lights within the 3D environment.
- **HDRIs (High Dynamic Range Images):** Collections of HDRIs that can be used for realistic lighting and reflections in 3D scenes.
- **Lighting Rig Templates:** Pre-built setups for common lighting scenarios, such as studio lighting, outdoor scenes, etc.
- **Lighting Effects:** Specialized effects or enhancements that can be applied to lights for creative or practical purposes.
