

Blender Market – Camera Pie Menu v1.2.4

2025-02-10 16:51:03 [label](#) [我要反馈](#) [下载页面](#)

This add-on provides an interface that provides a summary of camera functions.

New Changes:

- Fixed Japanese text.

Installation

- download file.
- Go to Blender's user preferences, then open the Add-ons tab.
- Click **Install** and choose your files.
- Check the box next to the name of the item to allow it.

The following functions are listed.

- Camera View
- Align Active Camera View
- Lock the Camera to view
- Select Active Camera
- Select All Cameras
- Select Camera to Active
- Create a Camera aligned to view
- Show/Hide Passepartout(You can alter the Passepartout alpha value using the Addon preferences)
- Frame Camera Bounds
- The Track To (Add "Track To" constraint to the active camera. Select the target, and after that, the camera after pressing the button automatically sets the target.)
- The track that is Damped Track(Add the "Damped Track" constraint to the active camera. Select the target, afterward the camera clicks the button again to set the target automatically.)
- Composition Guides
