Imagehausweddings – Cinematic LUTS:

This content introduces a collection of video LUTs (Look-Up Tables) designed to enhance skin tones and overall color balance for video editing, particularly in fashion and editorial productions.

Created by Henryk, a professional with over 12 years of experience, these LUTs are tailored to ensure polished, editorial-level results across various lighting conditions, locations, and camera systems. Compatible with Adobe Premiere Pro and Final Cut Pro, the LUTs offer cinematic quality while maintaining the integrity of video footage. The package includes 10 color presets and a PDF installation guide, streamlining the workflow for editors.
