CData Drivers for Google Ad Manager (DFP) empowers seamless integration and real-time access to Google Ad Manager data across a spectrum of applications and tools. Offering unparalleled query performance and comprehensive metadata access, these drivers facilitate effortless connectivity with BI, analytics, reporting, and data visualization platforms. Whether you're leveraging industry-standard BI tools or custom analytics solutions, these drivers ensure swift and reliable access to Google Ad Manager data, enhancing decision-making processes.

Focusing on ETL, replication, and warehousing, the extend support to popular ETL tools, enabling robust and secure data movement for Google Ad Manager integration. Whether you're facilitating operational reporting, optimizing query performance, or supporting data governance initiatives, these drivers provide the backbone for efficient data management. Additionally, they seamlessly integrate with RDBMS and data warehouses, augmenting data warehousing capabilities and facilitating various data management tasks.

Developers benefit from the simplicity and agility offered by the **CData Drivers for Google Ad Manager (DFP)**, enabling them to integrate Google Ad Manager data effortlessly into their applications. By providing a data-centric model that streamlines integration complexities, developers can expedite application development without compromising quality.

This package includes the following components:

- Excel Add-In for Google Ad Manager (DFP)
- Google Ad Manager (DFP) ADO.NET Provider
- Google Ad Manager (DFP) BizTalk Adapter

- Google Ad Manager (DFP) Data Cmdlets
- Google Ad Manager (DFP) FireDAC Components
- Google Ad Manager (DFP) JDBC Driver
- Google Ad Manager (DFP) MuleSoft Connector
- Google Ad Manager (DFP) ODBC Driver
- Google Ad Manager (DFP) Power BI Connector
- Google Ad Manager (DFP) SSIS Components
- Google Ad Manager (DFP) Tableau Connector

Key Features of **CData Drivers for Google Ad Manager (DFP)** :

1. Unmatched query performance and comprehensive metadata access
2. Seamless integration with BI, analytics, reporting, and data visualization platforms
3. Support for popular ETL tools, enabling robust and secure data movement
4. Integration with RDBMS and data warehouses for operational reporting and query optimization
5. Simplified integration for developers, accelerating application development
6. Support for data virtualization features like query federation and advanced capabilities for seamless data access and manipulation
