

Aescripts Precomp Anchor Repo v1.0 Full Pre-Activated

2025-02-10 17:12:29 [label](#) [我要反馈](#) [下载页面](#)

Twist anchor points and Places to coating, makeup, or parent place. Works using precomps + masks + monitor mattes + expressions + longer.

Precomps can be corrected just as with any other layer. The script finds a pre-comp content area according to each of the layers within.

Calculation Methods:

- Corner: Use coating corners to ascertain the area
- Vertex: Use coating vertices to ascertain the area

Layers

- 2D
- Strong
- Shape
- Text
- Null
- Footage
- Adjustment

Masks

- Insert
- Subtract
- Add-Inverted
- Subtract-Inverted
