

DISQLite3 v5.51.0 (21 Jan 2025) for Delphi 11 & 12 Athens + CRACK

2024-12-18 23:03:00 label 我要反馈 下载页面

DISQLite3 offers a self-contained, embeddable SQL database engine tailored for Delphi (Embarcadero / CodeGear / Borland), ensuring ACID transactions even during system crashes or power failures. With a zero-configuration setup, users can dive straight into database operations without administration. It supports most SQL-92 standards and stores entire databases in a single disk file, accommodating terabyte-sized databases and gigabyte-sized strings and blobs. Its self-contained nature means no external dependencies or DLLs are required, and it boasts a small footprint, compiling only the necessary code for efficient operation, with a mere 300 KB addition to code space.

enhances database functionality with features like Full Text Search (FTS), customizable tokenizer, prefix matching, optional word stemming for 30 languages, and database AES encryption with SHA256 key generation. Dispensing with the need for Db.pas, it ensures compatibility across all Delphi variants, including Standard and Personal editions. Despite its robust feature set, **DISQLite3** maintains simplicity with a straightforward API, ensuring ease of use for developers. Moreover, databases created with **DISQLite3** can be seamlessly accessed on Linux and MacOS platforms using SQLite3 libraries, further extending its versatility.

Key Features of DISQLite3 :

1. Self-contained, embeddable SQL database engine for Delphi
2. ACID transaction resilience, even after system crashes or power failures
3. Zero-configuration setup, eliminating the need for administration
4. Implementation of most SQL-92 standards
5. Single disk file storage for entire databases
6. Support for terabyte-sized databases and gigabyte-sized strings and blobs
7. No external dependencies or DLLs required
8. Small footprint, adding as little as 300 KB of code space

标签

- VCL Components Delphi

- 9. Full-Text Search (FTS) with customizable tokenizer and prefix matching
- 10. Optional word stemming for 30 languages
- 11. Database AES encryption with SHA256 key generator
- 12. Compatibility with all Delphi variants, including Standard and Personal editions
- 13. Faster performance compared to popular database engines for common operations
- 14. Simple, easy-to-use API for developers
- 15. Seamless access to databases on Linux and MacOS platforms using SQLite3 libraries.
