# Retro Game Text (Videohive 42114635) - AE Project

2025-02-10 16:41:32   label 我要反馈   下载页面

- A flexible and modular design.
- Three essential boxes for logo and text. The template contains three comps, each with boxes: one for logos, another one is a rectangle that can be used for text; and the final one is a rectangle with an "L" shape and placeholders for two texts. When you combine these comps, you can make intricate title animations similar to those in the video preview.
- Six animated pixel art. Add additional decoration to your titles.
- Five pre-made and complex titles. You see them in the video preview.
- Ability to alter the size, font, color, and more.
- These boxes can be a highly adaptable—automatic adaptation to the text. You can modify things such as the distance of extrusion, its angle and stroke width, the box color, and the margin. You can alter the motion of the boxes by changing the direction of movement and the distance.
- Resizable resolution.
- Transparent background.
- Any duration.
- The tutorial video includes the following.
- Compatibility to work with After Effects 2023 or higher.

100% Virus FREE and Safe
