Imagine you are trapped in the forest, desperate for assistance. You scream incessantly, hoping someone will hear your cries. However, you only hear the echo of your own voice. You're terrified, as if trees were alive and staring at you. This kind of scenario is typically seen in thriller and horror films. For the viewer, it will put you in the middle of the action, particularly the thrilling soundtrack. Bluezone's frightening Ambiences and Sound Effects place you in control when making soundtracks for film, TV, or video game soundtracks.
