How to use Dorado preset in Lightroom?

you can use Archipelago Quest – Quest 26 Zia Presets.

Where can I download the product?

After subscription, You can download it for free from here.

Archipelago Quest – Quest 26 Zia Presets: ZIA was created using golden sun-kissed photos as the top priority. Every color-graded variation of the preset can be used to create honey amber skin tones, with minor variations in tonality, and gives you the ideal grade for any scenario you might encounter. Three sunburst presets with vertical and horizontal variations are included, designed to enhance or create an existing light source for a unique and stunning effect. Also, use the Dorado preset to get the extra warmth your images have lacked!

What is Quest 26 Zia Presets?

These presets are likely intended for use in photo editing software like Adobe Lightroom or Adobe Camera Raw to simplify the process of achieving this particular aesthetic in post-processing. If you've purchased these presets, you can typically apply them to your images to quickly achieve the desired look, and then make further adjustments as needed to fine-tune the results for your specific images and style.
