Aescripts Karton v1.2.2:

Karton simplifies the creation of dynamic text boxes, making it both intuitive and versatile.

With a single click, you can produce a text box ready for use, thanks to Karton's ability to generate a new Shape Layer with a custom effect, keeping your workspace uncluttered.

This tool is perfect for designing responsive elements like chat bubbles and lower thirds for titles and subtitles.

It seamlessly integrates with Premiere Pro and supports Essential Graphics, allowing for easy customization and text modifications outside the main composition.

Karton features a user-friendly interface that lets you adjust text positions and offers flexible rotation and height adjustment options to ensure the text fits perfectly.

It also supports MOGRT templates and Essential Graphics, enabling quick setup and efficient text animation.
